Instructions

Dear Students,

I hope all is well with you. I am Ali Haider, your instructor for Multivariable Calculus. I'm writing to share the first assignment, which includes questions from reference books. Most of the questions are examples, along with some key definitions, and I've also included the relevant page numbers for your convenience. It is important that you thoroughly understand the examples and then solve the questions on your own.

Calculus by Thomas

- **Chapter 11 - Topics:** *Parametric Equations, Calculus of Parametric Curves, Polar Coordinates*
- **Define and Explain:** Hypocycloid, Astroid, Brachistochrones and Tautochrones (Page 657)
- **Examples:** 5,6,9 (Page 665, 669)
- **Examples:** 1, 2, 3 (Page 671, 672)

Calculus by Anton

- **Chapter 10 - Topics:** *Parametric Equations, Calculus of Parametric Curves, Polar Coordinates*
- **Examples:** 5,7,8 (Page 696, 697, 698)
- **Define and explain rectangular and polar coordinate system, Families of circle, rose, and Cardioids** (Page 706, 712, 713, 714)

Calculus by Stewart

- **Chapter 10 - Topics:** *Parametric Equations, Calculus of Parametric Curves, Polar Coordinates*
- **Example:** 4 (page 661)
- **Q: 1 to 4** (page 665)

Deadline:

Please ensure to submit the assignment by 12:00 PM on October 14th, 2024.
