Instructions

I hope you are doing well. I, Ali Haider, your course instructor for Multivariable Calculus, conducted the first lecture today. This lecture provided an introduction to the course and specifically covered Chapter 11: *Parametrizations of Plane Curves*.

Below are some practice questions for you to solve. Please make an effort to solve these questions independently. However, if you encounter any difficulties, you are welcome to reach out to me for assistance.

Practice Questions

- **Chapter 11:** *Parametrizations of Plane Curves*
- **Exercise:** 11.1
- **Page:** 659
- **Questions:** 1 to 10

These questions are from the textbook *Thomas' Calculus*. Please attempt all the questions and reach out if you need clarification or further guidance.

Contact Information

For any questions or concerns, feel free to contact me after 4:00 PM via email or in person.
