Digital Marketing (BUS-300)
Final Term: Fall 2025
Date: 19-11-25

Instructor: Nimra Abbas
Total Marks: 25 (13 + 12)
Time Allowed: 20 minutes

Name: Ali Shahid

Registration No: 12023-752

Part I: Theory Part (To be solved in the provided space below)

Duration: The duration of this part is 20 minutes

Plagiarism: Plagiarism will result in zero marks

No Questions: Asking questions during the exam is not allowed

Prohibited Items: Smartwatches and cell phones are strictly forbidden

Question # 1	CLO 2	[Marks: 3+3+2+2+3]
--------------	-------	--------------------

Q1) Attempt the following Questions:

1. What are the four major types of market segmentation used to divide a market into smaller groups?

1.5

- Demographical groups (marketing based on specific regions for personalization)
- Income groups (marketing done on targeting specific income groups).
- Niche groups (marketing done on a very specific set of population)
- Ethnic grouping (marketing done on specific ethnicity groups)

2. A company's website stops accepting new product photos and documents. Whenever they try to upload something, the system shows a storage-related warning message. Identify the issue and suggest how it can be managed.

If a website stops accepting new product photos and documents, when someone tries to upload anything, ~~it is rejected~~ and shows a storage related warning, it's possible that the storage in the hosting plan is full and has to be increased from hosting provider dashboard, or the uploaded file is too big than what site allows, and should be a. Another possibility is configuration related errors, it's possible after an update the configuration for connecting storage might get deprecated.

this is 5st

3

* increased from configuration.

3. What is a SERP? Explain the structure of a SERP and describe the main components that typically appear on it.

Search Engine Result Page is the page shown after we perform a search. The first 2-3 results are paid ads, the next 6-7 results are organic/seo based results then there is another 1-2 ads at the end of the page. Ads being related to searched query.

- Ad ✓
- Seo content indexed
- Ad

4. How can you check the last time a website was crawled by Google?

We can check it by cache: website url, entering this on url ^{of browser} and changing website url to the name of website will show the last time crawled.

5. During a 11.11 sale, the website becomes extremely slow and many customers are unable to load the pages. Traffic keeps increasing, and the site eventually becomes unresponsive.

During a 11.11 sale if the website becomes slow and becomes unresponsive, it ~~be~~ can be due to many factors and depends on the type of website, if it heavily relies on processing and rendering like a e-commerce or auto machining website ~~due to lack of enough v CPUs~~ the website can become unresponsive, another possibility is the bandwidth, the bandwidth might be too low for the hosting plan or the hosting provider might not be using good CDNs, for load distributing.
