

A Complete Guide To

Module 1: WEBSITE CREATION

Agenda

KEY TOPICS DISCUSSED IN THIS PRESENTATION

- ☐ Understanding the Website Importance
- ☐ Understanding Website Basics
- ☐ Website Creation Tools
- ☐ Installing WordPress on Localhost using FlyWheel
- ☐ Install WordPress on Localhost using XAMPP
- ☐ Applying Security on Your Website Through Wordfence
- ☐ Installling Other Plugins
- ☐ Creating your Own Website

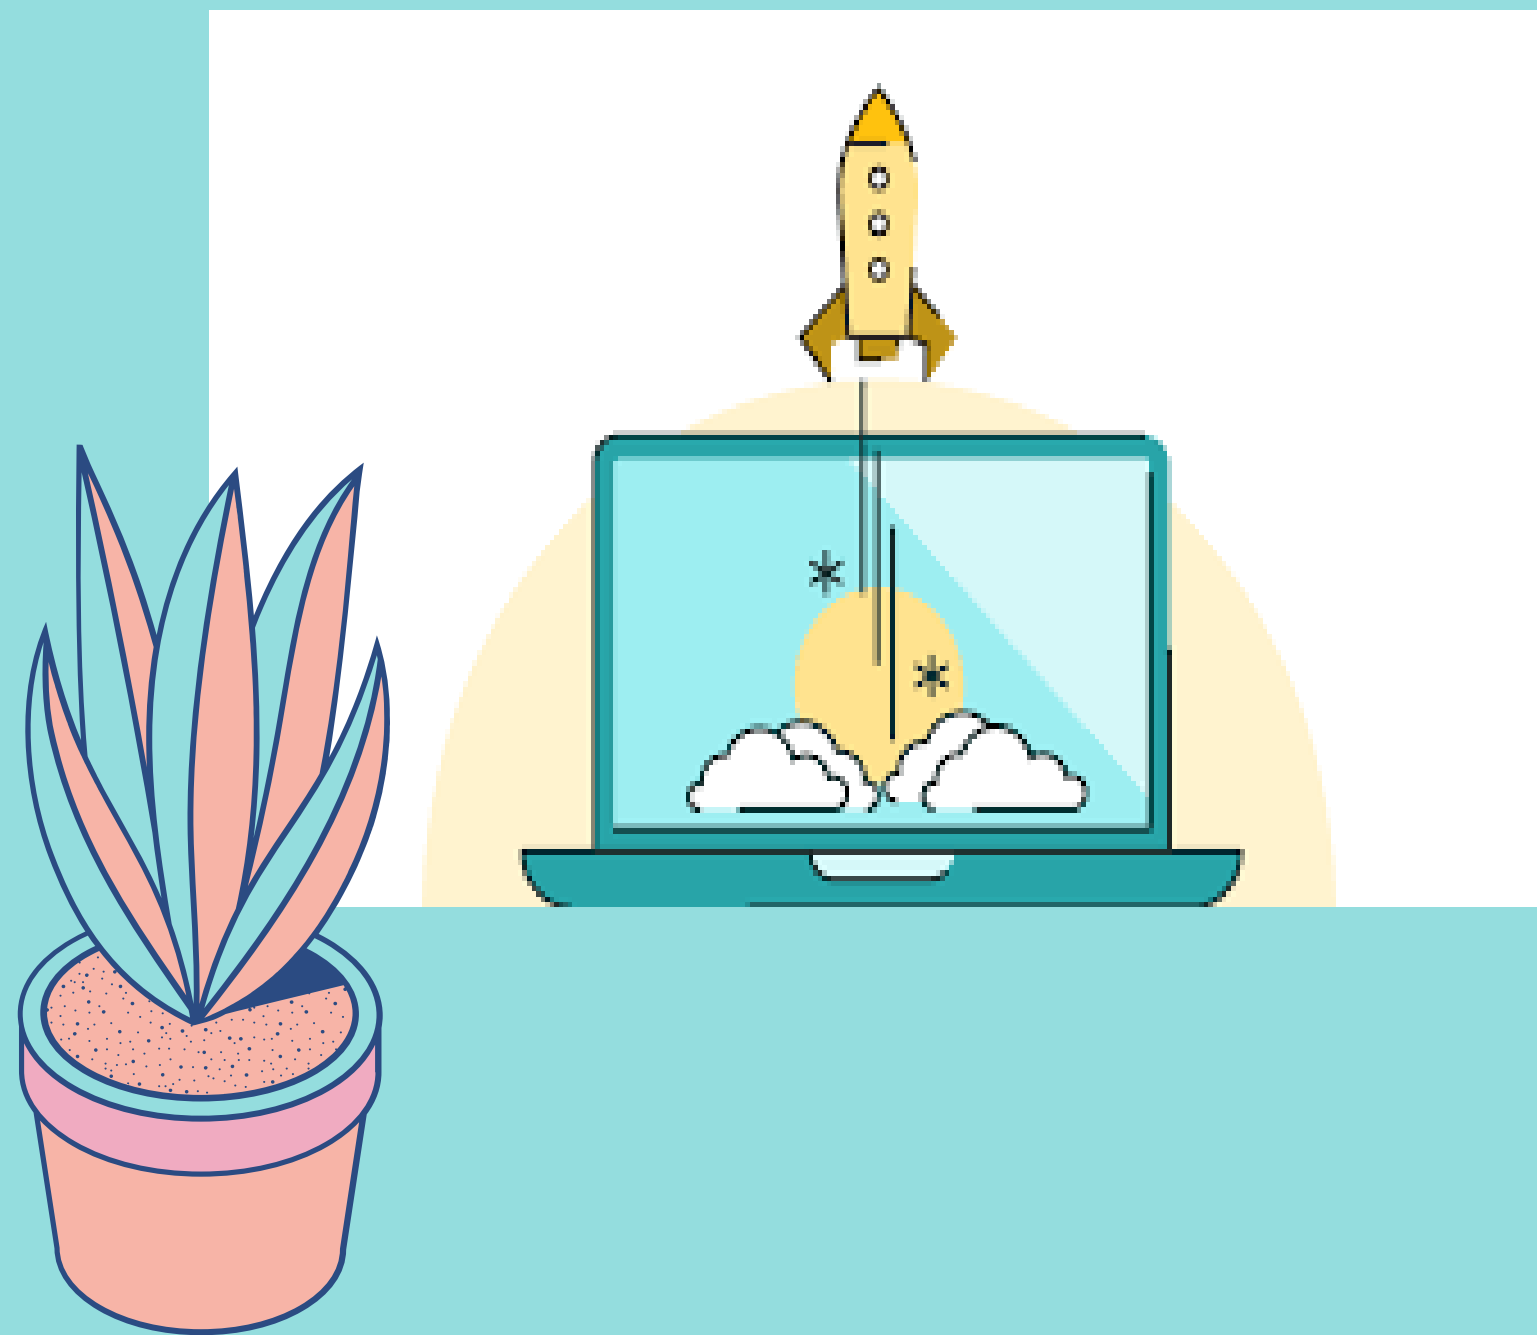

Understanding the Website Importance

Planning & Concept

- ❑ Purpose and Goal
- ❑ Content
- ❑ Graphics / Branding
- ❑ Which Tool to Use

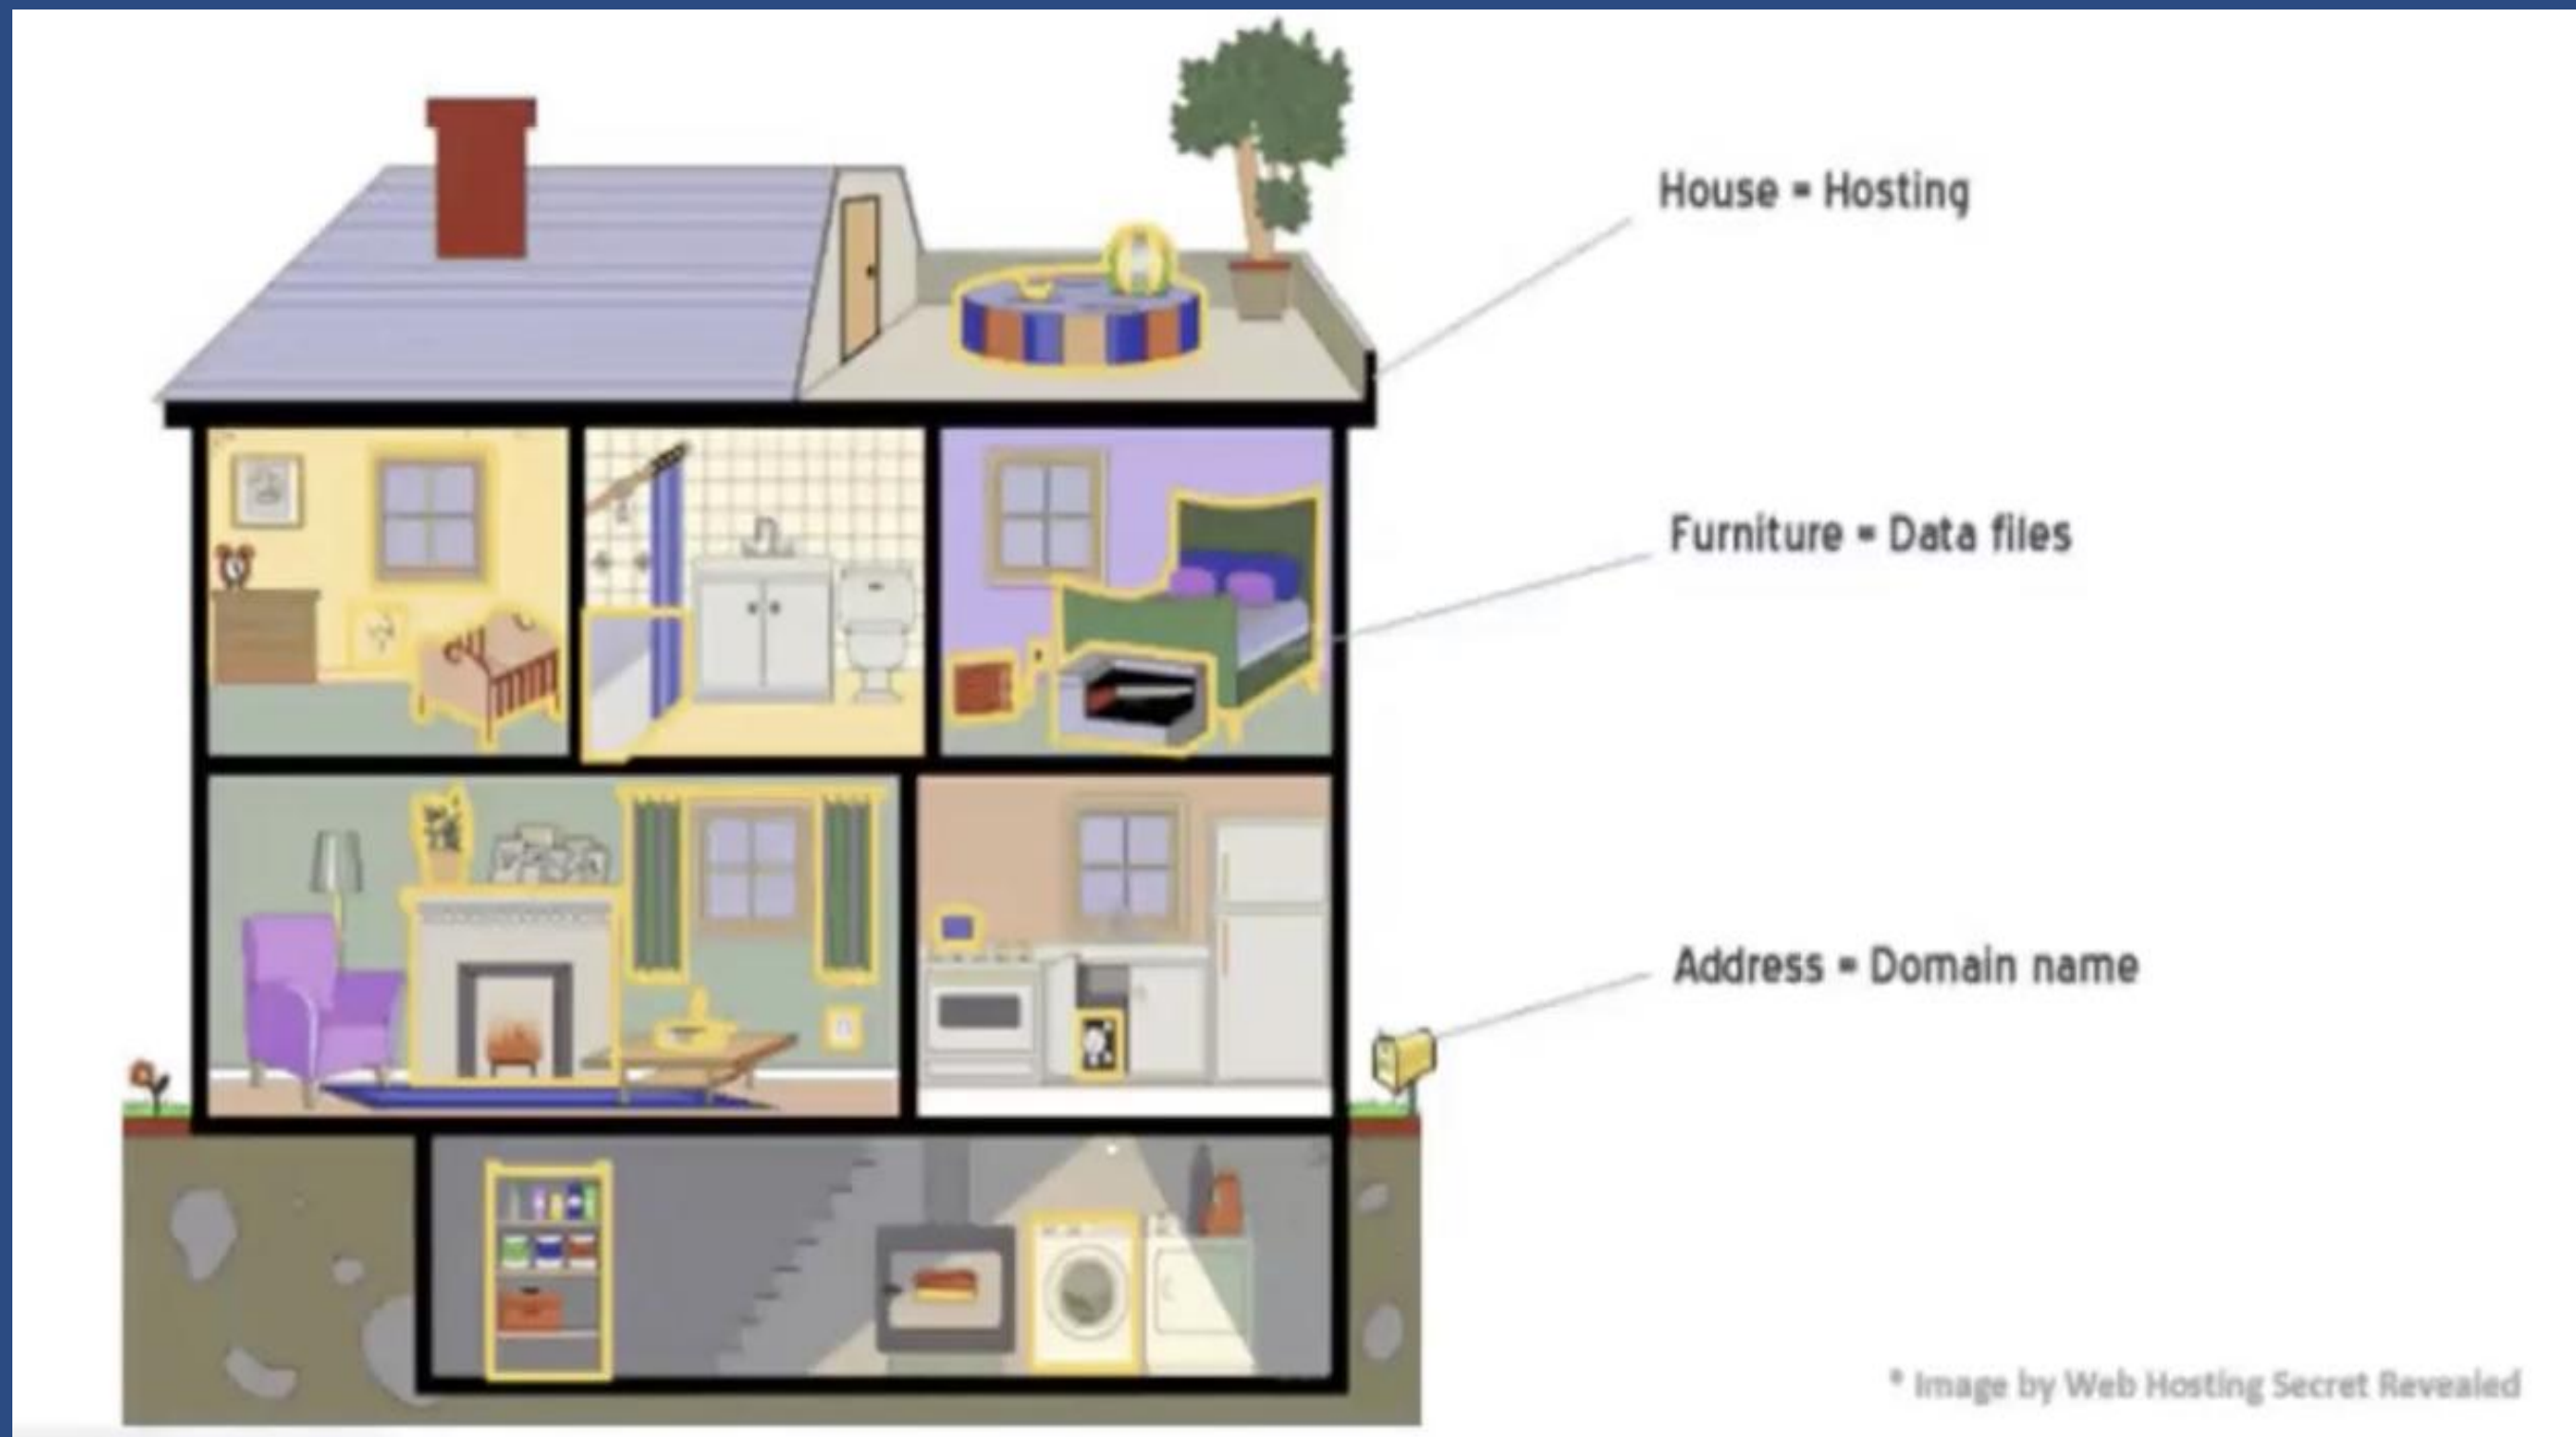

Types of Websites

- ☐ Corporate Website
- ☐ Personal Website
- ☐ Classified Website
- ☐ Social Media Website
- ☐ E-commerce Websites
- ☐ Forums
- ☐ Educational Website
- ☐ Government Website
- ☐ Entertainment Website
- ☐ Many more

Understanding Website Basics

Domains & Hosting

Where to Buy Domain and Hosting

Reliable Sources

- ☐ Hostinger.com
- ☐ Namecheap.com
- ☐ Thebeehost.com
- ☐ Hostgator.com
- ☐ Bluehost.com
- ☐ Hostbreak , and many more

Other Options

- ☐ GoDaddy.com (Low Quality)
- ☐ A2Hosting.com (Expensive)
- ☐ Dreamhost.com (Expensive)
- ☐ KnownHost.com (Expensive)
- ☐ Cloudways.com (Expensive)

Searching for a Domain Name

- ❑ Domains available on multiple platforms, pricing may vary
- ❑ Different domain extensions have different prices (e.g., nimra.com vs nimra.org)
- ❑ Some domain extensions are limited or restricted:

For example: Getting a .pk Domain

- ❑ .pk domains can be purchased from: pknict.net.pk, or any other Pakistani hosting companies like “thebeehost.com”
- ❑ Local providers offer .pk domains with region-specific benefits

Domain Ownership and Transfer

- ❑ If domain doesn't suit your business, it can be sold/transferred to others
- ❑ Transfer process involves:
 - Contacting your domain registrar/hosting provider
 - Sharing credentials securely
 - Registrar handles the ownership transfer
- ❑ Transfer can be lengthy, details usually handled by hosting company

Tips for Choosing a Domain Name

- ✓ Keep it short and simple
- ✓ Easy to remember
- ✓ Match domain name with your target audience
 - Example: Brands like “Minnie Minors, Hopscotch” target modern, educated users
- ✓ Use generic, brandable names (e.g., ECS instead of “Ehsan Chappal Store”)

Domain Naming Do's and Don'ts

- ❑ Avoid numbers unless part of your brand (e.g., McDonald's, not McDonald1)
- ❑ Avoid special characters (e.g., &, \$, etc.). These are also not allowed.
- ❑ Hyphen (-) is allowed but not recommended
- ❑ For Example:
 - K&N's domain is written as KandNs.pk without special characters

Different Types of Hosting

- ❑ Web hosting provides space on a server to make websites accessible online
- ❑ Different types of hosting cater to different needs and budgets

1.) Shared Hosting

- Multiple websites share the same server resource
- Cost-effective and beginner-friendly
- Ideal for small websites or blogs

3.) Dedicated Hosting

- Entire physical server dedicated to one user
- Full control, high performance, and better security
- Best for large websites or high-traffic applications

2.) Virtual Private Server (VPS) Hosting

- Server split into virtual servers for each user
- More control and resources than shared hosting
- Suitable for growing websites with moderate traffic

4.) Cloud Hosting

- Resources come from multiple servers (cloud infrastructure)
- Highly scalable and flexible
- Pay-as-you-go pricing with high uptime

Different Types of Hosting (Cont...)

5.) Managed Hosting

- Hosting provider manages the server, updates, and security
- Can be shared, VPS, or dedicated but with management services
- Ideal for users who want to focus on their website without server management

7.) WordPress Hosting

- Optimized specifically for WordPress sites
- May include pre-installed WordPress, automatic updates, and security features

6.) Reseller Hosting

- You buy hosting resources and resell them to others
- Suitable for businesses or individuals offering hosting services

Things to Check Before Buying

- Many types of hosting exist, but we will focus on Shared Hosting
- Shared Hosting is the least powerful and most affordable option
- Ideal for beginners and small websites
- Also known as web hosting
- **To select shared hosting:**
- Visit your hosting provider's website
 - Navigate to the hosting section from the menu
 - Choose Web Hosting / Shared Hosting option
- **Plans usually comes as:**
 - Standard performance
 - High performance

Important Features That Impact Cost

It includes : disk space/storage, number of domains allowed, bandwidth, SSL certificate, and number of domain emails

1.) Disk Space/ Storage

- Disk space defines how much data your website can store
- The domain name affects branding, but hosting affects website performance, security, and storage
- Hosting plans vary: 2GB, 4GB, 10GB, 20GB, 50GB, etc
- Most websites require 2-3 GB; larger sites may need 10 GB or more
- Choose hosting with enough disk space for your website's needs

Important Features That Impact Cost

2.) Number of Domains Allowed

- Hosting plans specify how many domains/websites you can host
- If you own multiple businesses, you may need multiple domains
- You can attach multiple domains/websites to a single hosting plan if the storage and plan allow it
- Check hosting plans for the number of websites allowed before purchase
- Example: A 40GB hosting plan may allow hosting multiple domains easily

3.) Bandwidth

- Bandwidth = The amount of data your server can transfer to visitors
- Minimum recommended bandwidth: 10 GB per month
- More bandwidth means better handling of traffic and faster website speeds
- **Example:** On sale days with high traffic, adequate bandwidth prevents website crashes
- 10 GB bandwidth can handle approximately 8,000-10,000 visitors monthly
- Bandwidth also impacts website loading speed

Important Features That Impact Cost

4.) SSL Certificate

- SSL = Secure Socket Layer, adds security to your website
- Like vaccinations protect children, SSL protects your website from cyber threats
- Converts your URL from http:// to https://, encrypting user data
- Protects user information such as login details, payments, and personal data
- SSL certificates are often included free with hosting plans
- Easy to install with a click in most hosting control panels

5.) Number of Domain Emails

- Professional email accounts linked to your domain name (e.g., info@yourdomain.com)
- Important for brand trust and communication
- Check hosting plans for the number of included email accounts

Website Development Options

Two main ways to develop websites:

- ❖ **Offline practice:** Using tools like XAMPP or Flywheel (free, local environment)
- ❖ **Online:** Buy domain and hosting and publish the site on the internet.

Types of E-commerce / Online Services

You can run:

- Local e-commerce targeting nearby customers
- Online services (teaching Quran, cooking, coding, etc.)
- Personal branding or freelancing

E-commerce Examples: (Go for brand names instead of generic ones)

Successful brand examples:

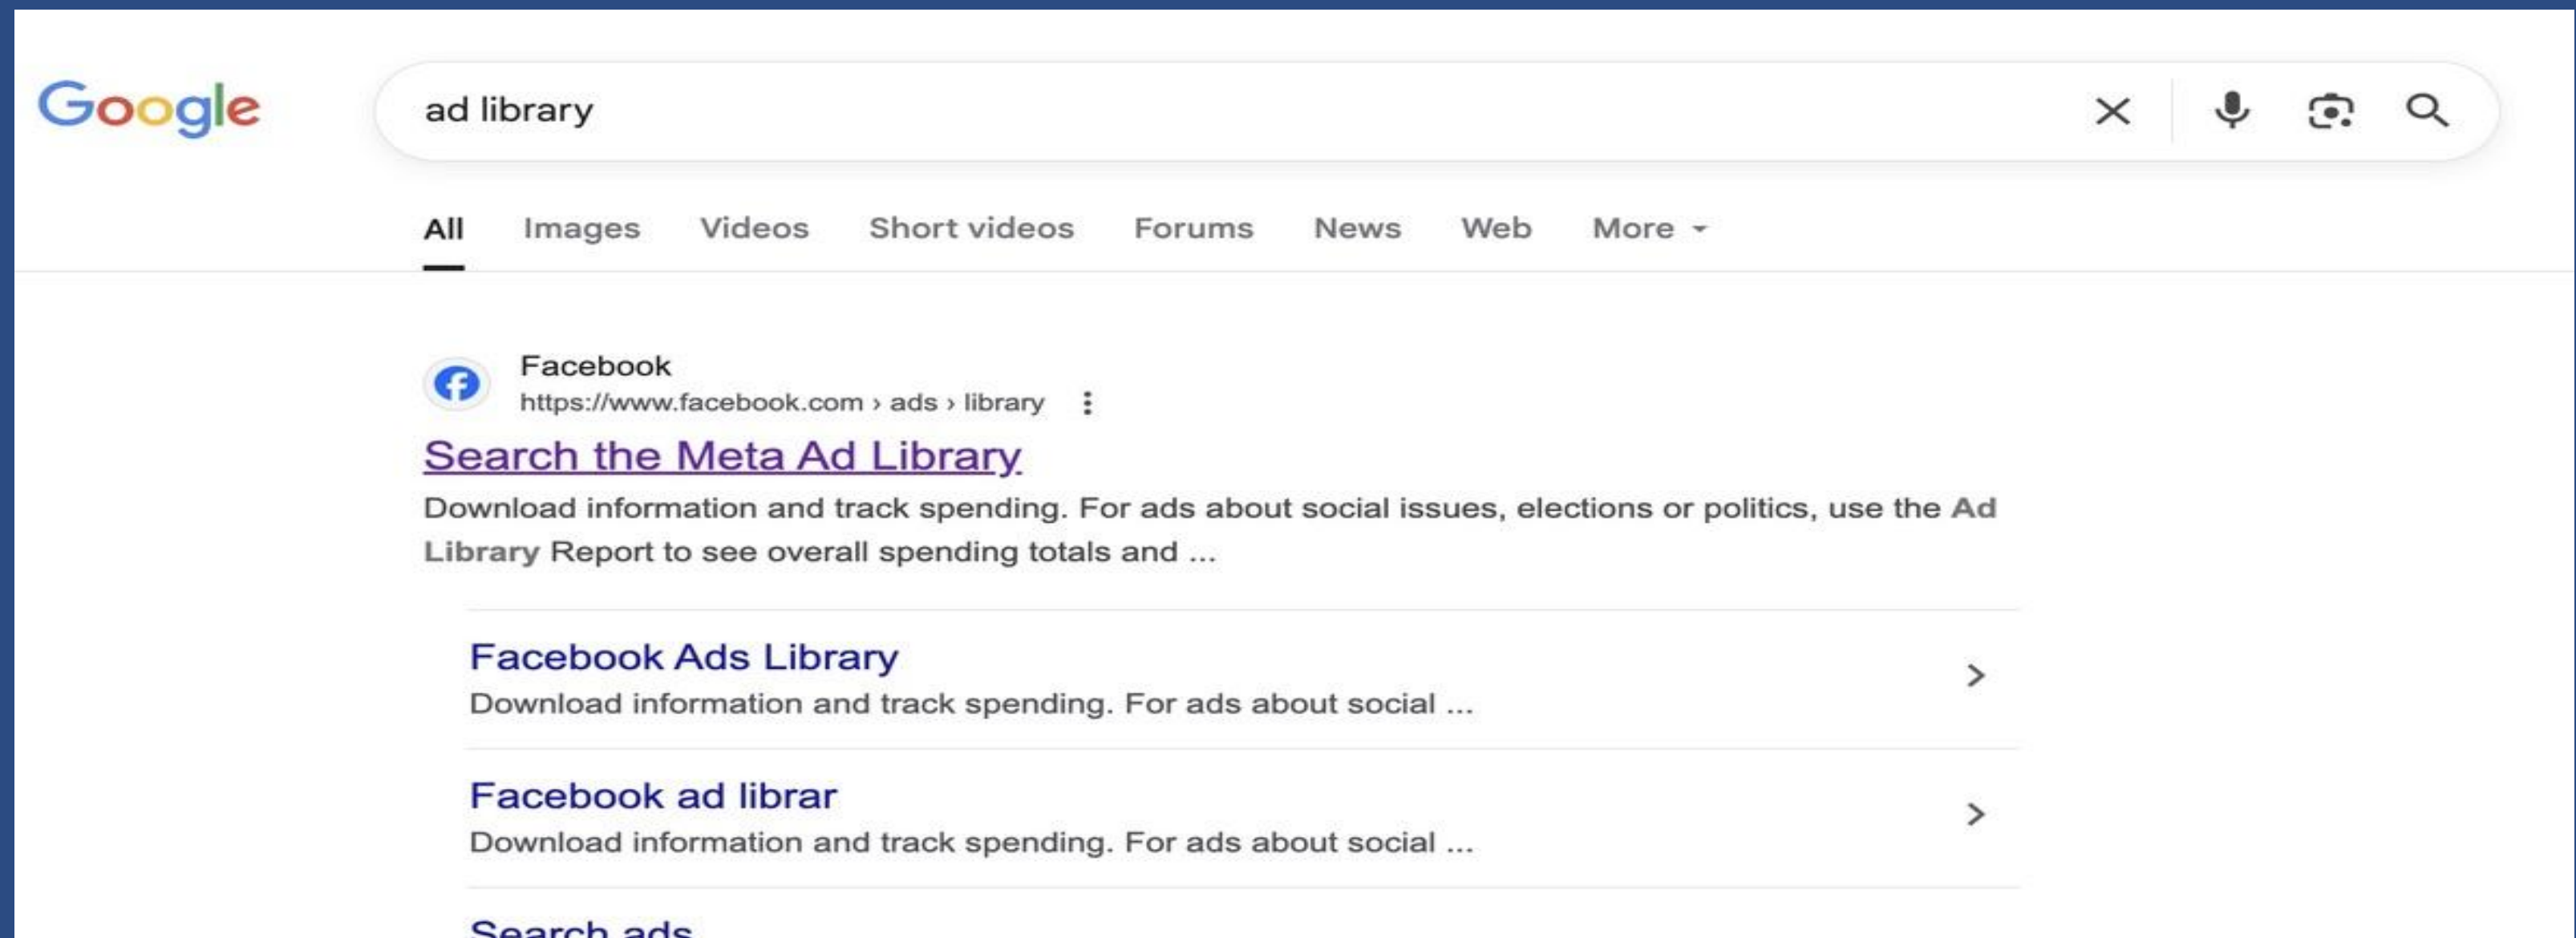

- Dari Mooch (darimooch.com)
- MENDEEZ (mendeez.com)
- FittedShop (fittedshop.com)
- TIFMO (tifmo.co)

Product/Service Validation

Use tools to validate your product/service idea:

- Google Trends for search popularity
- Facebook Ads Library to check competitor ads and popularity
- Search product ads to see if they are actively running
- Longer-running ads usually indicate successful products

Product/Service Validation

Ad Library

Search all of the ads currently running across Meta technologies, as well as:

- Ads about social issues, elections or politics that have run in the past seven years
- Ads that have run anywhere in the EU in the past year

To find an ad, search for keywords or an advertiser.

Select ad category

The screenshot shows the Meta Ad Library interface. At the top, the Meta logo is on the left, and navigation links for 'Ad Library', 'Ad Library report', 'Ad Library API', and 'Branded content' are on the right. Below the navigation bar, there are filters for 'Pakistan' and 'All ads'. A search bar contains the text '"Learn English"'. Below the search bar, a dropdown menu is open, showing a list of advertisers. The first advertiser is 'Learning English with Cambridge', with a Facebook profile picture and a verified badge. The second advertiser is 'LearnEnglish – British Council', also with a verified badge. The third advertiser is 'Learna AI: English Learning App'. The background of the page shows a blurred view of an advertisement for 'Free Home Delivery'.
