

# Install WordPress on Localhost using XAMPP

## Step 1

# Download XAMPP

1. Open your browser and go to [apachefriends.org](http://apachefriends.org)
2. Click Download XAMPP for your OS (Windows/Mac/Linux)

The screenshot shows the Apache Friends XAMPP website. The header includes navigation links: Apache Friends, Download, Add-ons, Hosting, Community, About, and a search bar. The main heading is "XAMPP Apache + MariaDB + PHP + Perl". Below this, a section titled "What is XAMPP?" describes it as a popular PHP development environment. A large XAMPP logo is displayed. At the bottom, there are download buttons for Windows, Linux, and OS X, each showing the version 8.1.1 (PHP 8.1.1). A green "Download" button with the text "Click here for other versions" is also present.

## Awesome!

Your download will start automatically. If it doesn't, [click here](#).

### Reading

Be sure to read the install instructions and FAQs:

- [Linux FAQs](#)
- [Windows FAQs](#)
- [OS X FAQs](#)
- [OS X XAMPP-VM FAQs](#)

You can find additional help on our forums or Stack Overflow.

### Tell Your Friends about XAMPP

I just got #XAMPP from @ApacheFriends  
<https://www.apachefriends.org#opensource>

[Tweet!](#)

## Step 2

# Install XAMPP

1. Run the downloaded XAMPP installer.
2. Click Next through the prompts.
3. By default, XAMPP installs to C:\xampp (Windows) or /Applications/MAMP (Mac).

## Step 3

# XAMPP Control Panel

1. Launch XAMPP; you'll see the Control Panel
2. The panel shows modules: Apache, MySQL, etc

## Step 4

# Download WordPress AND Extract

1. In your browser, go to [wordpress.org](https://wordpress.org), Click on “Get WordPress” and Download it
2. Extract the downloaded .zip file
3. Navigate to \*C:\xampp\htdocs and create a folder with a name of your choice (e.g., Learnwithnimra)
4. Copy the wordpress folder files and paste it in “Learnwithnimra” folder

## Step 5

# Start Apache & MySQL

1. In XAMPP Control Panel, click Start next to Apache and MySQL
2. Ensure both modules show Running in green

## Step 6

# Open phpMyAdmin

1. In your browser, go to “localhost/phpmyadmin” and the phpMyAdmin dashboard appears
2. Click New in phpMyAdmin
3. Enter Database name matching your folder (e.g., Learnwithnimra)
4. Click Create

## Step 7

# Run WordPress Installer

1. Go to localhost/Learnwithnimra in your browser
2. Select English and click Continue
3. Click Let's go!

## Step 8

# Database Connection

### 1. Enter the following:

- Database Name: Learnwithnimra
- Username: root
- Password: (leave blank)
- Database Host: localhost
- Table Prefix: wp\_

### 2. Click Submit

Below you should enter your database connection details. If you're not sure about these, contact your host.

|               |                                        |                                                                                        |
|---------------|----------------------------------------|----------------------------------------------------------------------------------------|
| Database Name | <input type="text" value="wordpress"/> | The name of the database you want to use with WordPress.                               |
| Username      | <input type="text" value="username"/>  | Your database username.                                                                |
| Password      | <input type="text" value="password"/>  | Your database password.                                                                |
| Database Host | <input type="text" value="localhost"/> | You should be able to get this info from your web host, if localhost doesn't work.     |
| Table Prefix  | <input type="text" value="wp_"/>       | If you want to run multiple WordPress installations in a single database, change this. |

## Step 9

# Install WordPress

1. Once you click on submit, the following page will open
2. Click on, “Run the Installation”

## Step 10

# Fill up all the Details

### 1. Fill in:

- Site Title
- Username (e.g., admin)
- Password
- Your Email

### 2. Click Install WordPress

Welcome to the famous five-minute WordPress installation process! Just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

## Information needed

Please provide the following information. Don't worry, you can always change these settings later.

Site Title

Username

Username can have only alphanumeric characters, spaces, underscores, hyphens, periods, and the @ symbol.

Password

Strong

 Hide

**Important:** You will need this password to log in. Please store it in a secure location.

Your Email

Double-check your email address before continuing.

Search engine  
visibility

☐ Discourage search engines from indexing this site

It is up to search engines to honor this request.

Install WordPress

## Step 11

# Login to Dashboard

1. After installation, click Log In
2. Enter your WordPress Username and Password
3. The WordPress Dashboard opens

## Step 11

# Login to Dashboard

1. After installation, click Log In
2. Enter your WordPress Username and Password
3. The WordPress Dashboard opens

# Site will open

## Blog

### Hello world!

Welcome to WordPress. This is your first post. Edit or delete it, then start writing!

July 12, 2025

“We’ve now explored two methods for running WordPress locally—using Local by **Flywheel** and **XAMPP**. It’s time to dive into WordPress itself : pick a theme, explore its features, and start customizing to make it your own!”

# Applying Security on Your Website Through Wordfence

## Applying Security on Your Website Through Wordfence

- You've deployed WordPress in a live environment via cPanel/DirectAdmin
- Your site is now mature - issues are rare, but when they occur, you handle them directly
- In your WordPress Dashboard, go to Plugins → Add New
- If any old security plugin exists, click Delete to remove it

# Step 1

## Install Wordfence

1. In Add Plugins, search for security
2. Locate Wordfence Security
3. Click Install Now, then Activate

## Step 2

# Get Your License

1. After activation, click Get your Wordfence License
2. You'll be redirected to Wordfence.com
3. Choose the Free Plan and select "I'm OK waiting 30 days for protection from new trends"

## Step 3

# Register & Install License

1. Enter your Email Address and click Register.
2. Check your email for the license key
3. In the email, click Install my License Automatically

## Get Wordfence Free

Site URL: <http://learnwithnimra.local>

Email

[nimraabbas94@gmail.com](mailto:nimraabbas94@gmail.com)

This is where you will receive your license key and any future security alerts for your website

Would you like WordPress security and vulnerability alerts sent to you via email?

Yes

No

☐ I have read and agree to, as applicable, the [Wordfence License Terms and Conditions](#), [Wordfence CLI License Terms and Conditions](#), the [Services Subscription Agreement](#), and [Terms of Service](#), and have read and acknowledge the [Wordfence Privacy Policy and Notice at Collection](#).

Register

## Check your email

You're almost done! Your license key has been sent to [nimraabbas94@gmail.com](mailto:nimraabbas94@gmail.com). **Check your email to complete the installation.** You can also request free keys on the license page when logged in to [wordfence.com](https://wordfence.com).

If you need additional help, you can visit [our documentation](#) to get help installing your license.

[Can't find the email?](#)

## Step 4

# Wordfence Dashboard

1. On the Wordfence page, click Install License
2. After installation, the Wordfence Dashboard appears with security status and alerts

## Step 5

# Successfully Activated

# Installing Other Plugins

# Install Classic Editor

- In Plugins → Add New, search Classic Editor
- Click Install Now, then Activate.

# Understanding WordPress Themes

- Free Themes
  - Limited customization options
  - No demo content
  - Average design quality
- Pro Versions of Free Themes (Paid Upgrades)
  - Expanded customization options
  - Occasional demo content imports
  - Average design quality
  - Starter templates in some cases
- Premium Themes
  - Fully paid, professional themes
  - Extensive customization controls
  - Superior design quality
  - Bundled premium plugins/features
  - One-click demo installer
  - Plug-and-play functionality

# Understanding WordPress Themes

## ➤ Premium Theme Marketplaces

- ThemeForest.net: Largest marketplace with thousands of premium themes
- Top Seller: Avada – versatile, feature-rich, highly customizable

## ➤ Introducing Elementor

- In Plugins → Add New, search Elementor
- Click Install Now, then Activate
- Add New Page → Click Edit with Elementor

## ➤ Next Steps

- Experiment with Elementor templates and global styles
- Explore advanced widgets: Forms, Sliders, and Popups
- Review Elementor documentation and community tutorials
