Introduction to SEO

- **Intent**
- **How to Access SMERush Tool?**

Intent

- **Keyword Intent**

- C -> Commercial Keywords - buying/purchase intent, e.g., smartphone prices
- T -> Transactional Keywords - more buying intent, e.g., buy smartphone, hire accountant
- I -> Informational Keywords - information intent, e.g., how to hire accountant, how to speed up your smartphones, etc
- N -> Navigational keywords -> competitors keywords -> e.g., daraz smartphones -> never target these keywords

Keyword Selection Criteria

- Search Volume -> more than 300
- Keyword Difficulty / Competition -> less than 35
- Intent : a.) Ecommerce/Service/Real Estate/Portfolio/Company -> Commercial
b.) Blogging -> Informational

- Keyword Difficulty / Competition -> less than 35
- Intent : a.) Ecommerce/Service/Real Estate/Portfolio/Company -> Commercial
b.) Blogging -> Informational

Content - Internal Links

The screenshot displays a dashboard titled 'Platform integration: Intent Signal is everywhere'. It features a bar chart showing performance metrics across various categories. Below the chart, there is a quote from a client: 'It's exciting to have actionable data to back up our strategy in the often-rebulous space of SEO / SEM. BrightEdge Intent Signal helps us take away the guesswork.' The quote is attributed to 'Dariusz Lach-Walczak, Owner, Unique Vintage'.

What is it?

Internal links are links that go from one page on a domain to a different page on the same domain. They are commonly used in main navigation within a site.

Internal links are often useful for several reasons:

- To allow users navigate a website
- To help establish information hierarchy for the given website
- To help spread link equity across a website
- To use as a "soft conversion" CTA for top-of-the-funnel content

Talking about SEO

- **SEMRush Tool**

- SEMRush tool -> Keyword Overview -> Enter Keywords
- Pick Target Region
- Click on “Search”
- Class Activity : Think of your brand and generate keywords using gpt and check its score and pick the kewyords

- **Keyword Selection Criteria**

- Volume -> montlhy search volume -> higher the search volumne, more the traffic
- KD (Keyword Difficulty) -> It means that how much it is difficult to rank on some keyword, higher the KB more difficult to rank means it has more competition in the market
- **KD : 0 - 20** : very easy to rank, ifs its between **20 - 35**: easy to rank, if its between **35: - 45**: hard to rank, and if its between **45: - 60**: very hard to rank,
