

Draw a complete visual representation [5] of the data structure created, and write down the output [5].

```
class Node {
public:
    int data;
    Node* next;
    Node* prev;
};

int main() {
    Node a; Node b; Node c; Node d; Node e;
    a.data = 1; b.data = 2; c.data = 3; d.data = 4; e.data = 5;

    a.next = &b; a.prev = &e;
    b.next = &c; b.prev = &a;
    c.next = &d; c.prev = &b;
    d.next = &a; d.prev = &c;
    e.next = &b; e.prev = &d;

    Node* ptr = &e;
    cout << ptr->next->next->data << " ";
    cout << ptr->next->prev->next->data << " ";
    cout << ptr->prev->next->prev->data << " ";
    cout << ptr->prev->prev->data << " ";
    cout << ptr->next->next->next->data << " ";
}
```

3 2 5 5 4
