

Name : _____

Reg Number: _____

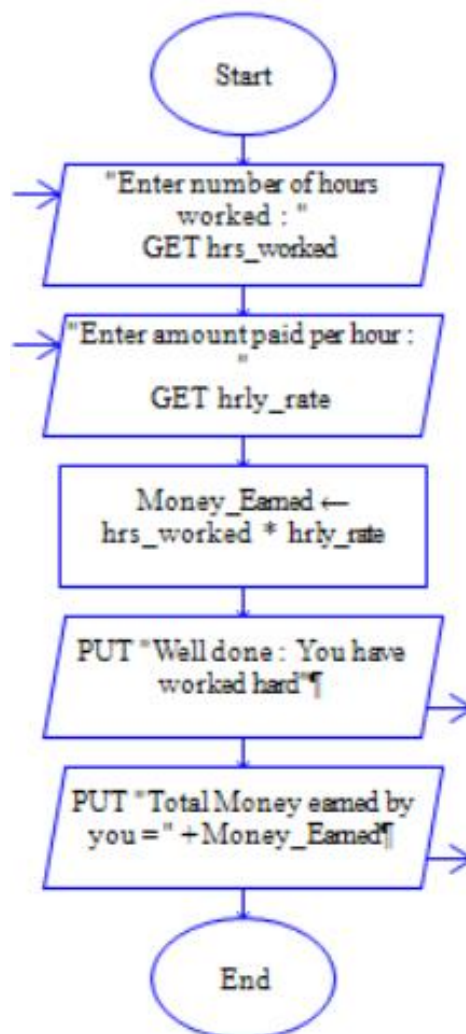

Attempt all questions and show complete working in your Answer Booklet

Question-1

- i. List four major hardware parts/components of a computer system? [4]
- ii. List four input and four output devices [4,4]
- iii. Which memory is faster than primary memory (RAM: Random Access Memory)?
Give one reason. [2,1]

Question-2

Convert the flowchart given below into pseudo code. Explain in one sentence what is this program doing. [5,1]

Question-3

Complete the conversions and write your answers in table below: [3]

Ser. No.	Decimal Number	Binary Equivalent
1	2002	
2	51	
3	10011	

Question-4

Write answers in **your booklet** after showing complete working. [6]

Ser. No.	
1	Convert $(1110101100110)_2$ into $(?)_{16}$
2	$(111001110)_2 + (11110110)_2$ Carry out the addition and write answer
3	Convert 2BA3 into $(?)_8$
4	Write 1's Complement of $(11101110110)_2$
5	Write 2's Complement of $(1100001110)_2$
6	$(100011001)_2 - (110111)_2$ Carry out subtraction and write answer

Question-5

Write the program logic (in pseudo code) for creating a Body Mass Index (BMI) Calculator. Ask the user to enter the weight in pounds and height in inches. Your program should display the BMI for the entered values. [5]

$$BMI = \frac{weightInPounds \times 703}{heightInInches \times heightInInches}$$
