

INTRODUCTION TO INFO. & COMM. TECHNOLOGY

27-09-2023

The Binary Number System

Power of 2	2^7	2^6	2^5	2^4	2^3	2^2	2^1	2^0	
Decimal Value	128	64	32	16	8	4	2	1	
Binary Representation	0	0	0	1	1	1	0	1	29
	1	0	1	0	1	1	0	0	172
	1	0	1	1	1	1	0	1	189
	0	0	1	0	0	1	1	0	38

Binary to Decimal

Power of 2	2^7	2^6	2^5	2^4	2^3	2^2	2^1	2^0
	128	64	32	16	8	4	2	1
Binary value					1	0	1	1
	8 + 0 + 2 + 1							
Decimal Equivalent	= 11							

Binary to Decimal

Power of 2	2^7	2^6	2^5	2^4	2^3	2^2	2^1	2^0
	128	64	32	16	8	4	2	1
Binary value	1	0	1	0	1	0	1	0
Decimal Equivavlant	128 + 0 + 32 + 0 + 8 + 0 + 2 + 0							
	= 170							

Program-1

- Write a program that allows the user to enter the last names of a candidate in a local elections of Punjab province.
- It also accepts the number of votes received by candidate.
- The program then outputs the names of candidate, number of votes received

Program-2

- Ask the user to enter an integer value. The program displays “”You have entered an even number” if it is even. Otherwise the program displays “You have entered odd number”

Ref Chapters

- Book 2
